Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1 and 45 are rejected under 35 U.S.C. 102(b) as being anticipated by **Stanners et al.**

Art Unit: 3763

FIG. 4

FIG. 5

FIG. 6

FIG. 7

FIG. 8

FIG. 9

The cited patent in figures 4-9, show a barrel having an open end and provided with a restrictor in the vicinity of the open end, a plunger slidable in the barrel and an injection needle unit for connection to the barrel, the restrictor having at least one aperture sufficiently small as to prevent egress of liquid filling the barrel prior to connection of the injection needle to the barrel.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-7, 9-11, 13-18, 31-34, and 44 are rejected under 35 U.S.C. 103(a) as being unpatentable over **Stanners et al.**

This rejection is made in view of the subject matter in claims 9 and 13 disclosing an "intended use" for the syringe and a restrictor integral to the barrel, respectively. The examiner notes that the cited patent does not expressly disclose these limitations. However, these limitations are considered conventional in the art as evidenced by the case law on point.

In relation to the "**intended use**" disclosed in claim 9, a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. **In re Casey**, 152 USPQ 235 (CCPA 1967).

Art Unit: 3763

Accordingly, since the apparatus disclosed by **Stanners et al.**, is capable of performing the intended use disclosed in claim 9, it is concluded that the cited reference meets claim 9.

Finally, in relation to the subject matter of claim 13, the court's holding in In re Larson, 340 F.2d 965, 144 USPQ 347, 349 (CCPA 1965), suggests that limitations indicating that parts of an apparatus are integral or separable should not add patentable weight to a claim. Accordingly, the fact that in claim 13, the restrictor is integral with the barrel should not be considered an innovation sufficient to overcome the cited reference.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. In addition to the cited reference in the rejections above, the examiner of record invites applicant to review the patents made of record before drafting a response to this Office Action.
